

## Vauxhall / Opel

Corса 1.0i, 1.2i with 'Easytronic' gearbox

CLTB 0011

# OPTIONAL ADAPTABLE CLUTCH KIT TO REPLACE SELF ADJUSTING UNIT

### Concerns

The self adjusting clutch (SAC) fitted to the models above (HK2097) is extremely susceptible to handling damage prior to fitment, specifically 'self adjust de-adjusting'.

Also, special tooling is required to mount the SAC to the flywheel.

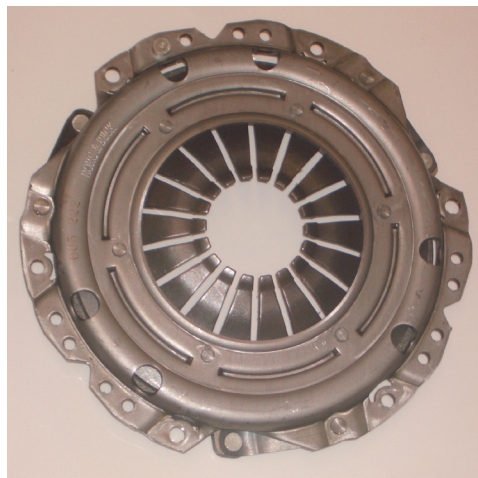

A non self adjust clutch kit has been developed to counter these problems.

### Method

HK2097 now contains a 'traditional' type clutch cover assembly as shown below.

Clutch Cover with Self Adjust System

Traditional type Clutch Cover Assembly

The advantages of fitting the optional adaptable designed clutch kit are:

- EASE OF FITTING - no special tooling required
- CANNOT DE-ADJUST - no vulnerable self adjust mechanism to damage
- RELIABILITY - thanks to proven traditional technology
