Ducato 2.3 TD 2006> - Clutch Kit HK2194

CLTB 0013

HK2194 TRANSPORT SPACER

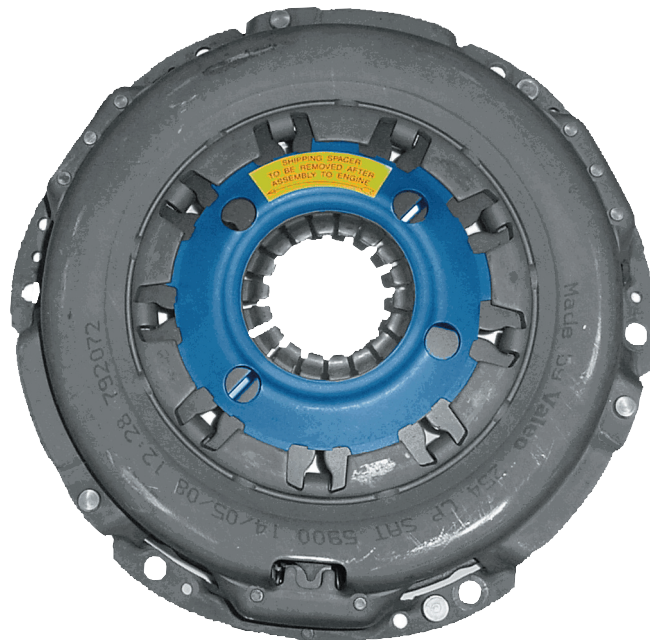

Concerns; Failure to remove the transport spacer before refitting the gearbox to the back of the engine can result in major component failure.

Method; With the transit spacer in place fit the cover assembly and driven plate to the flywheel using a suitable alignment tool for the driven plate.

When bolted up to the flywheel the spacer will become loose and can be revolved anti-clockwise until the tags are in line with the slots/spaces in the cover pressing.

When the tags and slots are aligned the spacer can then be removed.

The gearbox can then be re-fitted to the back of the engine.

The transit spacer is highlighted in blue for illustrative purposes only
