Toyota Aygo / Citroen C1/ Peugeot 107 Clutch Application Specification Change of Clutch Diameter from 180mm to 190mm

Date Issued: 07/2009

Vehicle Applications:

Toyota Aygo - 1.0 (KGB10, 1KR-FE)

Peugeot 107 - 1.0 (1KR-FE)

Citroen C1 - 1.0 (1KR-FE)

The vehicle manufacturer has issued a technical bulletin regarding clutch noise issues and premature clutch wear on the above models.

In cases where a customer complains of:

- Slipping clutch
- Noise from clutch during stop and go conditions
- Abnormal smell from clutch.

A service directive has been issued to replace the original clutch kit with a larger diameter clutch assembly. The original 180mm clutch will now be replaced with a larger 190mm clutch (with increased clutch cover mass) to rectify premature wear & noise issues.

Due to this, **Blue Print will now only offer the 190mm clutch assembly option on the above applications.**

Actions

Due to the increase in size of the clutch diameter, Blue Print recommends that the vehicle's flywheel is always checked when replacing the original 180mm clutch assembly with the new 190mm clutch kit. If required Blue Print recommends that the flywheel is either professionally machined or replaced when increasing the clutch assembly size.

Clutch Kit – ADT330246

Please refer to [Blue Print LIVE!](#) for up-to-date applications.

All Blue Print clutch kits fitted from the 1st February 2009 are now warranted against manufacturing defects for a period of three years with unlimited mileage.
