

Technical Bulletin

TCK134L & TCK133C Upgrades

Keeping in-line with OE designs

Engine Codes: **BMW** 1.6d N47, 2.0d N47, 3.0d N57. **MINI** 1.6d N47 & 2.0d N47

Issue: The old style guide rails with their honeycomb design were prone to premature wear and exaggerating noise from the chain.

Solution: The new guides have been reinforced with rubber to improve durability and also to dampen noise from the chain. The chain has also been re-engineered to improve performance and longevity by increasing the thickness of the chain links.

Old Design

TCK134 & TCK134C

New Design

TCK134L & TCK133C

Best Availability. Best Value.
Best Quality. Best Service.
