

## Mountings and Bushes

# VAG Suspension Bush

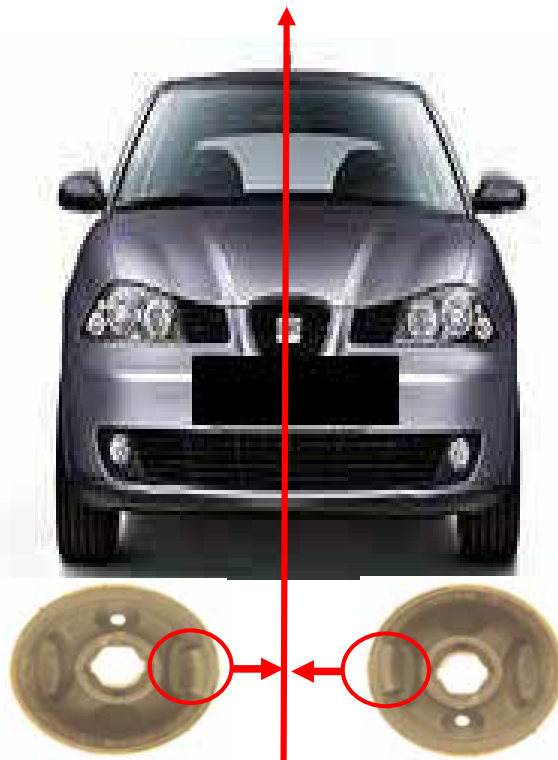

## FSK6368 & FSK6368HD

MBTB 0003

- VAG :- Seat Cordoba, Seat Ibiza, Skoda Fabia, Skoda Roomster, VW Fox, VW Polo
- FSK6368 & FSK6368HD
- Continuing deterioration in road surfaces and the further introduction of speed calming devices has resulted in increased loads placed on steering and suspension components.
- The front lower wishbone rear bush as fitted to certain VAG models seem to suffer quite badly from premature wear associated with adverse operating conditions.
- First Line has introduced a heavy duty version of FSK 6368 which should prolong service life and also improve wishbone location.

### SPECIAL INSTRUCTIONS & FITTING TIPS

- Firstly, ensure that the plastic casing of the old bush is removed prior to fitting new bush!
- First Line recommends the use of Specialist Tools to install the new bushes to prevent deformation and damage which could seriously compromise the effective operation and service life of the new bushes.
- When installing the replacement bush it is important that it is in the correct orientation.
- see diagram.
