

## *Additional Brake Light*

### MS-Design rear spoiler

The Hella brake light 2DA 005 739-117 can be used as a replacement for the original in a ms-design rear spoiler, when this fails due to water ingress. Only the corners must be cut out, with a small hacksaw, to match with the original. The original lamp is shown on the top and right (see picture 1+2). The fastening points, right and left, must be modified. The area between the markings must remain in its original condition (picture 2).
