

## **Fiesta `96 Build Year 08.95-08.99**

## **Puma Build Year 08.95-08.99**

## **Ka Build Year 09.96-08.99**

Some vehicle in this build range experience drumming noises from the dashboard when the temperature position is between minimum and maximum.

### **To rectify the problem:**

To rectify the problem the insulation of the heater valve and the left hose from the valve to the heater must be changed.

1. Remove the heater valve and the left hose
2. Remove the insulation and fit the new one
3. Fit the new hose and the heater valve

### **Please note:**

It is important that correct de-aeration of the cooling system is carried out.

1. Put control switch of the heating on maximum
2. Fill up coolant to maximum and replace the reservoir cap
3. Start the engine, bring it to operating temperature at 3000 rpm ( Fan must run twice)
4. At idle check the coolant, then stop the engine
5. Check the coolant again after 1 hour again and top up if necessary
