

## ***Ford Mondeo II with TD engine***

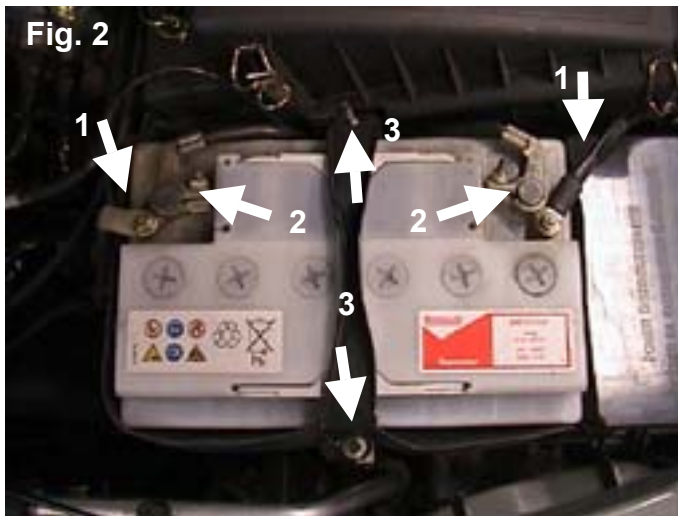

### **Bulb replacement, left-hand headlamp**

To replace or renew the bulbs on this vehicles, the following procedure can be adapted.

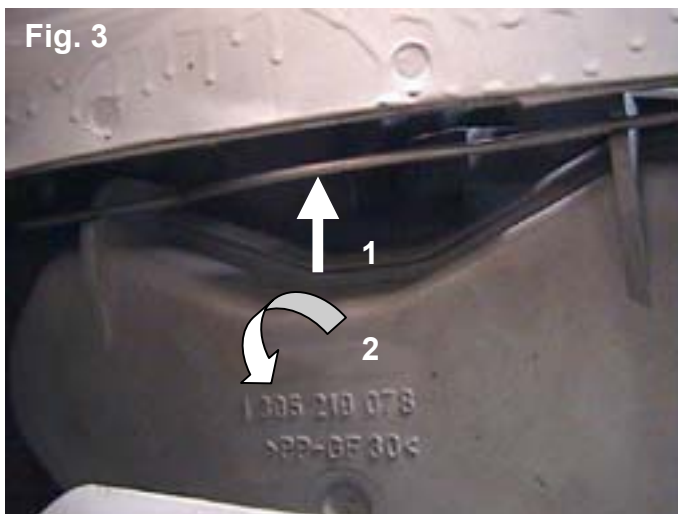

1. Note the radio code
2. Remove the cover cap from the fuse box (Fig.1). Pull the safety clip forwards (1) and then lift the cover off (2)

3. Undo the auxiliary cable (Fig. 2) from the battery terminal clamps (1)
4. Loosen the battery terminal clamps and then pull them off the battery terminals (2)
5. Unscrew the nuts which secure the battery (3)
6. Remove the battery from the support bracket

7. Press the retaining clasp (Fig. 3) upwards (1) and remove the headlamp cover (2)

8. Having replaced the bulb, carry out all the steps in the reverse order
9. Enter the radio code again and check that the radio is working
