

## *Opel Vectra B*

### **Different compressors**

The Vectra B has various Harrison and Denso compressors fitted. These can be different despite same vehicle types (e.g. belt pulley alignment). To be sure that the ordered part is the right one, order only using the original part number!

Please remember to check the correct oil charge of the compressor before fitting (see poster or technical specifications) !

We recommend using our PAO-Oil (Hella N<sup>o</sup>.: 8FX 351 214-021 and -031) for charging purposes.
