

## **Volvo** **S70 | V70 | C70**

### **Headlight vibration**

With the above-mentioned vehicles, the headlights can vibrate on account of unevenness in the road surface or high speeds.

Types and production numbers that may be affected:

S70 with factory code 1 (11th position in the VIN)  
from production no. 409466 (12th to 17th position in the VIN)

S70 with factory code 2 (11th position in the VIN)  
from production no. 408556 (12th to 17th position in the VIN)

S70 with factory code 3 (11th position in the VIN)  
from production no. 422325 (12th to 17th position in the VIN)

V70 with factory code 2 (11th position in the VIN)  
from production no. 342001 (12th to 17th position in the VIN)

V70 with factory code 3 (11th position in the VIN)  
from production no. 356958 (12th to 17th position in the VIN)

C70 with factory code J (11th position in the VIN)  
from production no. 000339 (12th to 17th position in the VIN)

To remedy the situation, an additional bracket (drawing, pos. A) is mounted per headlight; these brackets are available through the dealerships.
