Tension Pulley

fits:

Audi A6 / Avant / Quattro (Ref. no. 074 109 243 F)
VW Transporter (T4) / Syncro (Ref. no. 074 109 243 F)
VW LT (Ref. no. 074 109 243 F)

PROBLEM

The tension pulley loosens.

CAUSE

The bolt required by the vehicle manufacturer can loosen. Consequently, the position of the tension pulley can change, and (in the worst case scenario) cause serious engine damage.

Ref. no. 074 109 243 F

SOLUTION

SWAG offers a safe alternative!

SWAG now supplies the tension pulleys SWAG 30 03 0077, 30 03 0059 and 30 03 0060 with a special bolt featuring a micro-encapsulated safety device. The safety device on the bolt keeps the bolt tightened to specifications and, therefore, it cannot loosen prematurely. This prevents warranty claims and engine damage.

i.e. SWAG no. 30 03 0059

Ref. no. 074 109 243 F

ATTENTION

The torque of the SWAG special bolts is 20 ± 1.5 NM
