

Clutch centring tool

Valeo service technical department receive a number of calls regarding the parts supplied with clutch kits:

801107, 801291, 801985, 821071, 821074, 821075, 821177, 821184, 826553, 826554, 826558

Contained in these clutch kits is the clutch cover plate, clutch friction plate, release bearing and clutch plate alignment tools.

The alignment tools supplied is the centring rod and a metal flywheel insert. The metal insert is a support and is designed to be placed in the centre of the flywheel. The centring rod is then aligned through the clutch cover and friction plate, and locates into the metal insert in the flywheel. The insert is not designed to be removed once the clutch is fitted and will not affect the performance and lifetime of the clutch.
