

## 826726 bearing design change

Part Number: 826726

For Vehicle: Nissan Navara 2.5 Years 07/05 onwards

Valeo Technical Support have received a number of calls regarding the design of the bearing in clutch kit 826726 being different to the bearing being removed from the vehicle.

After further investigating the issue we can confirm that there are two types of bearing depending upon the origin of manufacture. If the bearing in the clutch kit is of the Koyo type bearing it may contain a bearing with an additional shield when compared to the OE bearing. Please be aware the contact points will be the same and the different design will not affect the performance of the clutch.

*Koyo bearing with the additional shield*
