

All you need for professional repairs!

Control Arm Mounting Kit

febi no. 32418

Repl. No. 1 477 858 S3 (Ford)

Repl. No. 31277464 S3 (Volvo)

Repl. No. B32H-34-250E S4 (Mazda)

You can't buy this control arm mounting individually from the manufacturer. Previously if this control arm mounting failed, the whole unit would have to be replaced as the components could not be bought separately.

febi bilstein has the solution for a timely and efficient repair:

The control arm mounting is now also available individually.

Fits:

Ford Focus 04, Focus 08, C-Max 03, C-Max 07

Volvo C 30, C 70 II, S 40 II, V 50

Mazda 3 (BK), 5 (CR)

Please note!

Although in this case Ford, Volvo and Mazda all share the same platform, Mazda uses a different thread on the control arm mounting.

For this reason, febi bilstein supplies all the appropriate bolts in the ProKit (febi no. 32418). This combination enables a professional repair of all vehicle types referred to above. This will save time and money for both the workshop and their customer!

Anyone using a ProKit can safely assume that it contains all the parts necessary for the repair. Discover the new complete repair kits at: www.febiprokit.com

Simply ask for spare parts by febi bilstein.
