Stabiliser link ProKit

febi no. 36440

OE no. 5087.57

Fits: Peugeot Partner, RCZ, 5008

OE stipulates that the stabiliser Link (febi 36440) needs to be made from aluminium not steel, this is due to its weight and space reducing properties.

The febi stabiliser link 36440 is designed to OE specifications and manufactured to the highest standards, and what's more they are supplied with the collar nuts needed to finish the job properly.

Modern motor vehicles require their steering geometry and suspension set-up to be precisely configured. Only by replacing worn components in pairs can the correct configuration can be maintained.

febi bilstein has the solution for a timely and efficient repair:
The Stabiliser link is now available with the collar nuts as a ProKit!
This saves your customer time because a febi ProKit contains all the parts you need for a repair!
