

febi

Tip

The quick repair solution!

In only about 30 minutes per side with the **febi supporting joint repair kit for all Renault Laguna 2, Espace 4, Trafic 2, Vel Satis, Opel Vivaro, Nissan Primastar**

febi no. 22265 • Comparison no. 77 01 476 576

Everybody knows it: The collar of the supporting joint tears down particularly early with these vehicle types and grease emerges. The part must be renewed. This defect is also in the focus of each general inspection and is well-known to the TÜV and other inspection organizations.

Everyone who wants to save time and money can perform the repair of the supporting joint **WITHOUT** removing and replacing the suspension arms. To do so, you just have to open the fastening rivets of the supporting joint by boring and remove them.

To this purpose, febi bilstein offers the repair kit 22265 that includes the supporting joint as well as an attachment kit (incl. 3 collar screws, 3 self-locking nuts).

The time and cost saving repair of the supporting joint using the repair kit follows the trend: Half a year ago febi was the first company in the after market to include the part in the program that has turned into a fast mover since that time.

Please ask your febi partner for spare parts by febi bilstein!
You will also find all spare parts at www.febi.com.
